

Hrafnkell Baldursson

Full-Stack Web Developer

Contact Information

Birthdate **30.12.1993, Reykjavík, Ísland**
Email **hrafnkell.baldursson@gmail.com**
Homepage **hrafnkellbaldurs.com**
Phone **(+354) 861 6532**
Address **Blahamrar 2, 112 Reykjavik**

Education

08.13 - 05.16 **BSc in Computer Science**, *Reykjavik University*, Reykjavik.
08.12 - 05.13 **Highschool Degree**, *Borgarholtsskóli*, Reykjavik.
08.09 - 05.13 **Graphic Design Degree**, *Borgarholtsskóli*, Reykjavik.

Experience

11.15 - 12.15 **Internship**, *Reykjavik University*, Reykjavik.
This was a class I finished at RU called "RU-Internship" where students contributed to a new version of the university's intranet, called Centris. I contributed Web API and front-end design and implementation of the online exams in Centris.

About me

I'm a 22 year old student on the last semester of my Bachelor's Degree in Computer Science. When it comes to software development, I'm an enthusiastic and dedicated team player. Most of the projects I've worked on have been team projects, so I'm used to working in a team. During my education at Reykjavik University I have grown very fond of web and mobile development, especially when working with web services and creating them. Even though I love web development, I also like to dvelve into complex algorithms, data structures, speed optimization and responsiveness of software. I also have been playing with graphic design using Photoshop and Illustrator since I was 14 years old. More info about me and my projects can be found at hrafnkellbaldurs.com.

Skills

HTML

Three years of experience. I would say that I am quite experienced but you can always learn more.

JavaScript

Three years of experience. Most of the time I've spent using JS has been spent on school projects.

Node.js

One year of experience. I have mostly made web services and back-end logic with Node.js.

C

Three months of experience. I don't have much experience with C, mainly because I prefer high level programming to low level, but I've used it in many school projects.

C#

Two years of experience. I've used it in Visual Studio to create web apps and web services.

Python

Six months of experience. I've gotten to know it a little bit, but would like to know more.

Photoshop

Eight years of experience. I've been using Photoshop since I was 14 years old and I've made a lot of projects with it related to graphic design and user interface design. Most of the projects can be viewed on my website.

CSS

Six months of experience, but I know how to use it and I can work out problems if they occur.

AngularJS

Two years of experience. I love to use it for front-end development since it's simple to use and effective.

jQuery

Two years of experience. I have used it in quite a lot of school projects and have learned to use it well.

C++

One year of experience. I love to use it, but I haven't had the time to use it more.

Java

Two years of experience. I've used Java to develop algorithms and web solutions.

SQL

One year of experience. I studied SQL in a Database Systems course and have used it beside other projects.

Illustrator

Four years of experience. I've been using Illustrator mostly with Photoshop to make vector images, but some projects I've made have been made exclusively in Illustrator.

Languages

Icelandic **Native Language**
English **Excellent**
